Buy Outcome Mapping: Building learning and reflection into development programs Spi by Earl, Sarah, Smutylo, Terry (ISBN: 9780889369597) from Amazon's Book Store. Everyday low prices and free delivery on eligible orders.

Outcome Mapping: Building learning and reflection into ...
Outcome Mapping: Building learning and reflection into development programs. This book by Sarah Earl, Fred Carden and Terry Smutylo takes an original approach to assessing development impacts by focusing on the way in which people relate to each other and to their environment rather than simply evaluating the products a program produces.

Outcome Mapping: Building learning and reflection into ...
Outcome mapping supplements traditional forms of evaluation, which focus on changes in conditions or well-being. It has been developed in organisations where monitoring and evaluation are primarily intended to help with programme learning and improvement. Outcome mapping differs from traditional forms of evaluation in a number of ways.

OUTCOME MAPPING
Outcome mapping introduces monitoring and evaluation considerations at the planning stage of a programme. It actively engages groups and teams in designing a learning-oriented plan and encourages self-reflection. How to use it The outcome mapping process is divided into three stages (A-C) and twelve steps (1-12).

TOOL 11 OUTCOME MAPPING

Outcome mapping is the centrepiece of our approach, and the cornerstone of our software OutNav. Outcome mapping – or impact mapping, depending on your preference, is an approach that helps to set (or 'map') out the steps that link the activities of a project, programme or organisation to the outcomes that are important.

What is outcome mapping?, Matter of Focus home of OutNav
Outcome mapping (OM) is a methodology for planning and assessing projects that aim to bring about 'real' and tangible change. It has been developed with international development in mind, and can also be applied to projects (or programme) relating to research communication, policy influence and research uptake.

Outcome Mapping: A Basic Introduction - Research to Action
Outcome mapping provides a method for knowledge and learning programmes to plan for and assess the capacities that they are helping to build in people, groups and organisations. Outcome mapping does not attempt to replace the more traditional forms of planning, monitoring and evaluation, which focus on changes in condition or in the state of wellbeing.

Outcome mapping | Managing for Sustainable Development Impact
Outcome mapping establishes a vision of the human, social and environmental betterment to which the programme hopes to contribute and then focuses monitoring and evaluation on factors and actors within that programme's direct sphere of influence.

Tools for Knowledge and Learning Outcome Mapping
Outcome mapping is based on principles of participation and purposefully includes those implementing the programme in the design and data collection so as to encourage ownership and use of findings. It is intended to be used as a consciousness-raising, consensus-building and empowerment tool for those working directly in the programme.
