References - project examples - Big Dutchman

Intensive pig farming, also known as pig factory farming is a subset of pig farming and of Industrial animal agriculture, all of which are types of animal husbandry, in which livestock domestic pigs are raised up to slaughter weight. These operations are known as AFO or CAFO in the U.S. In this system of pig production, grower pigs are housed indoors in group-housing or straw-lined sheds, whilst pregnant sows are housed in gestation crates or pens and give birth in farrowing crates. The use of g

Plastic flooring with an integrated rubber mat. SowComfort is a very durable, non-slip rubber mat guaranteeing a secure foothold for the sow when she stands up or lies down. A special method has made it possible to permanently integrate the rubber mat into the slat during manufacturing. As a result, SowComfort can easily be incorporated into the Big Dutchman plastic flooring system.

Fewer Feed Losses - individual feeding results in virtually no old feed remaining in the trough. Improved Hygiene - the feed in the trough is always fresh! Less Stress for Sows and Piglets - whisper-quiet operation keeps from disturbing other barn inhabitants. Increased Livability in Piglets - removing a universal feed time eliminates the excitement and bedlam that occurs among sows at "meal time", improving piglet safety.
